## A Prognostication.

### Of Plentie and dearthe in vic-

tualles, this yeare. *M.D.lviij,*

**I**n considering the face of heauens: the .iiii. quarters of the yeare, with the Eclipse of the mone after the minde of Bonatus, wheate, rie, and barlie, shal haue indifferent good successe, and be at low price, and al kind of sustenance shal for the most part, prosper, but that the eclipse of the mone in April, doth threatē domage to oren, nete shepe, herbes, trees, and that is cominge out of y<sup>e</sup> earth. Such shalbe indifferent plentiful, and yet at hie price, in like case dates, but hony shalbe plentiful & low of price, wines though they shal suffer somewhat, by reson aforesaid, yet shalbe of no hie price, Oliues shalbe chepe, nuttes, Filbards, and chesnuts, shalbe indamaged somewhat, thowoe the malice of Saturne, and the eclipse. Therefore pray vnto god, which made the Planets, to turn the ill disposition, and send vs plentie, for whiche let al faithful Christians pray.

shal not al together be free from this influence, be-  
cause of the opposite beames of the moone vnto  
Aries. Pray therfore continually, for this brie-

### Of Sickenesse and infirmities like to insue this peare.

**I**n the winter time many melancolike passiōs
